EXECUTIVE SUMMARY

The purpose of this report is to act as a resource for the Governor's Office and Legislature to assist them in making informed decisions relating to employee compensation and benefits.

To this end, the Division of Human Resource Management conducts a salary survey for the purpose of comparing salaries paid to State employees with those of other employers. The authority for the survey is contained in NRS 284.175(5) as follows:

"The Administrator may make recommendations to the Legislature during regular legislative sessions concerning salaries for the classified service of the State. In making recommendations during regular legislative sessions concerning salaries for the classified service of the state, the Administrator shall consider factors such as:

- (a) Surveys of salaries of comparable jobs in government and private industry within the State of Nevada and western states, where appropriate;*
- (b) Changes in the cost of living;*
- (c) The rate of turnover and difficulty of recruitment for particular positions; and*
- (d) Maintaining an equitable relationship among classifications."*

Out of 41 Nevada municipalities, private employers and western state governments invited to participate in the survey, 88% participated.

This report reflects salary data in effect in July 2014.

Due to the small number of private employers who ultimately chose to respond to the survey, the percentage differentials indicated make it difficult to make any statistical inference due to unit-non-responsive bias.

A benefits survey was also conducted in conjunction with the salary survey. Benefits surveyed were health, dental, vision, life insurance, retirement, holidays, sick leave and annual leave. The results of the survey of Nevada municipalities and western state employers' retirement benefits indicate the State of Nevada's benefits at 13.25% lag behind the average of approximately 19.95%. The range for annual leave days for these employers is 13-22 days as compared to the State of Nevada at 18 days. Four employers also have additional personal and bereavement leave banks. Additionally, 4 municipalities out of 20 pay a higher life insurance benefit than the State of Nevada.

SALARY SURVEY PROCEDURE

The 2014 Salary Survey Program was designed by the Department of Administration, Division of Human Resource Management to facilitate the collection, analysis and presentation of wage and salary information used by Personnel Directors, Elected Boards, and Commissions as a means for making and approving compensation recommendations. The program included the selection of classes, the survey sample, the survey methodology and the application of the data as described below.

SURVEY SAMPLE

The survey sample includes Nevada employers and western state governments. Nevada employers represent a cross section of the largest employers from the private sector, city and county governments, school districts and hospitals. Western state governments include Colorado, Idaho, Montana, New Mexico, Oregon, Utah and Washington.

SELECTION OF CLASSES

A class is included in the salary survey because it is a representative benchmark class selected as a basis for measuring the overall competitive position of the State with respect to salaries paid in the labor market. It will be used along with other selected benchmark classes as a basis for recommending any general across-the-board adjustment for State employees.

Twenty-seven classes were selected as benchmark classes representing all classes and pay grades.

SALARY SURVEY METHODOLOGY

Employers were asked to report the minimum as well as the maximum salary paid for each survey class (also known as their salary range). The information provided was for salaries in effect in July 2014 and reflects any cost of living increases.

SALARY COMPARISONS

Salaries compiled for classes included in the classified employees salary survey have been compared to salaries taken from the State's employee/employer paid compensation schedule. Employee/employer paid salary information was selected because it more closely reflects the pay practices of the State of Nevada. According to State of Nevada Public Employees Retirement System, approximately 64% of Nevada State employees are on the employee/employer compensation schedule.
