MEMORANDUM
HR#55-14

November 17, 2014

TO: Personnel Commission Members
Department Directors
Division Administrators
Agency Personnel Liaisons
Agency Personnel Representatives
Employee Representatives

FROM: Lee-Ann Easton, Administrator *Lee-Ann Easton*
Division of Human Resource Management

SUBJECT: PROPOSED CLASSIFICATION CHANGES

Attached are proposed classification changes for your information pursuant to NRS 284.160, subsections 3 through 5. If you have any comments or objections regarding these changes, please send your written notification to Peter Long at plong@admin.nv.gov no later than December 18, 2014.

If no written objections are received in this office by December 18, 2014, action will be taken to effect the changes and a report will be made to the Personnel Commission.

NOTICE OF PROPOSED CLASSIFICATION CHANGES

Number: Posting #08-15
Posting Expires: December 18, 2014

Per NRS 284.160, the Administrator may make a change in classification without the prior approval of the Commission. The following change(s) are proposed:

CURRENT				PROPOSED			
CODE	TITLE	GRADE	EEO-4	CODE	TITLE	GRADE	EE0-4
7.706	Insurance Actuarial Analyst III	41	B	<i>7.706</i>	<i>Insurance Actuarial Analyst III</i>	<i>41</i>	<i>B</i>
7.710	Insurance Actuarial Analyst II	39	B	<i>7.710</i>	<i>Insurance Actuarial Analyst II</i>	<i>39</i>	<i>B</i>
7.712	Insurance Actuarial Analyst I	37	B	<i>7.712</i>	<i>Insurance Actuarial Analyst I</i>	<i>37</i>	<i>B</i>

Basis for Recommendation

At the request of the Department of Business and Industry, Division of Insurance, minor changes were made to the minimum qualifications of the Insurance Actuarial Analyst I eliminating the requirement that an individual work at either an insurance company, a regulatory setting or another rate setting to qualify for the trainee level. An informational note was added stating that the agency has identified certain insurance-related credentials and designations that may be counted towards experience. Additionally, the length of experience required in preparing, analyzing, and applying review rates and rating plans was decreased from two years to one year and the requirement for experience “above the bachelor’s degree level” was removed from all three levels of the education and experience equivalency statement. The agency feels these changes would improve recruitment efforts without reducing the quality of a candidate.

Insurance Actuarial Analysts analyze actuarial data to either establish or review insurance rates for appropriateness and compliance with statutes and regulations; review property/casualty or life/health rate filings to determine an insurance company’s financial soundness; ensure that rates are commensurate with benefits; analyze actuarial data used in insurance company annual statements; and ensure compliance with State and federal insurance laws and regulations. Incumbents conduct actuarial and statistical studies; provide analysis for consulting actuary’s reports; analyze premium rate requests from insurance companies; analyze rate filings to determine compliance with all pertinent State and federal statutes, regulations and mandates. Additionally, they evaluate rates and amendments by applying actuarial principles and methodology to determine mathematical accuracy and appropriateness; analyze and draft technical regulations, opinions and bulletins to implement and clarify highly complex State and federal statutes; receive and review insurance complaints and consult with parties involved; review business practices and initiate or recommend administrative actions including cease and desist orders; respond to informational requests from consumers, industry representatives, elected officials, the general public, and other interested parties regarding contracts, rates, mandated benefits and other insurance issues; and analyze forms submitted by insurers for completeness and compliance with statutes and regulations.

7.706 – Insurance Actuarial Analyst III, Grade 41: Under general direction, incumbents supervise lower level actuarial staff and perform the full range of duties described in the series concept. Incumbents are responsible for the most difficult analysis requiring the application of advanced actuarial principles such as actuarial analysis of data to arrive at rates, analysis of data submitted in required industry reports, and analysis of reserves to determine the solvency of insurance companies.

7.710 – Insurance Actuarial Analyst II, Grade 39: Under general supervision, incumbents perform the full range of duties described in the series concept. In addition, incumbents independently interpret and apply statutes and regulations to form and rate filings, testify at regulation hearings, analyze cost stabilization methods, and represent the division at legislative hearings on proposed legislation. This is the journey level in the series.

7.712 – *Insurance Actuarial Analyst I, Grade 37*: Under close supervision, incumbents perform some actuarial duties described in the series concept. Work is assigned by the supervisor and reviewed for technical accuracy. Progression to the next level is not automatic; however, incumbents may progress to the next level after two years of experience interpreting and applying relevant statutes and regulations, resolving consumer complaints, and reviewing rate filings, and with the approval of the appointing authority.

The Division of Insurance supports the changes.

Note: Changes, additions and/or deletions on the class specification are noted in red.

The formal recommendations and specifications are on file with the Division Administrator, Human Resource Management. To view a copy in Carson City, go to 209 East Musser Street, Room 101; in Las Vegas, go to 555 East Washington Avenue, Room 1400. For more information call (775) 684-0130.

Objections to the proposed change(s) must be received in writing by December 18, 2014. Objections should be addressed to Peter Long, Deputy Division Administrator, Compensation, Classification and Recruitment, Section of the Division of Human Resource Management, 209 East Musser Street, Room 101, Carson City, Nevada 89701-4204.

INSURANCE ACTUARIAL ANALYST II	39	B	7.710
INSURANCE ACTUARIAL ANALYST I	37	B	7.712

SERIES CONCEPT

Insurance Actuarial Analysts analyze actuarial data to either establish or review insurance rates for appropriateness and compliance with statutes and regulations; review property/casualty or life/health rate filings to determine an insurance company's financial soundness; ensure that rates are commensurate with benefits; analyze actuarial data used in insurance company annual statements; and ensure compliance with State and federal insurance laws and regulations.

Conduct actuarial and statistical studies; provide analysis for consulting actuary's reports; and conduct studies that may involve research, statistical sampling, project development and recommendations.

Analyze premium rate requests from insurance companies; analyze exposure and loss experience data, insurance classification, operating expenses and profit ratios to determine if requested rates conform to State regulations.

Analyze rate filings to determine compliance with all pertinent State and federal statutes, regulations and mandates.

Evaluate rates and amendments by applying actuarial principles and methodology to determine mathematical accuracy and appropriateness.

Analyze and draft technical regulations, opinions and bulletins to implement and clarify highly complex State and federal statutes; analyze new and proposed legislation, and represent the agency at legislative hearings.

Receive and review insurance complaints and consult with parties involved; recommend administrative intervention as appropriate.

Review business practices and initiate or recommend administrative actions including cease and desist orders; assist and cooperate with enforcement personnel who investigate, evaluate and identify statutory violations.

Respond to informational requests from consumers, industry representatives, elected officials, the general public, and other interested parties regarding contracts, rates, mandated benefits and other insurance issues.

Analyze forms submitted by insurers for completeness and compliance with statutes and regulations.

Perform related duties as assigned.

CLASS CONCEPTS

Insurance Actuarial Analyst III: Under general direction, incumbents supervise lower level actuarial staff and perform the full range of duties described in the series concept. Incumbents are responsible for the most
