EXECUTIVE SUMMARY

The purpose of this report is to act as a resource for the Governor's Office and Legislature to assist them in making informed decisions relating to employee compensation and benefits.

To this end, the Division of Human Resource Management conducts a salary survey for the purpose of comparing salaries paid to State employees with those of other employers. The authority for the survey is contained in NRS 284.175(5) as follows:

"The Administrator may make recommendations to the Legislature during regular legislative sessions concerning salaries for the classified service of the State. In making such recommendations, the Administrator shall consider factors such as:

- (a) Surveys of salaries of comparable jobs in government and private industry within the State of Nevada and western states, where appropriate;*
- (b) Changes in the cost of living;*
- (c) The rate of turnover and difficulty of recruitment for particular positions; and*
- (d) Maintaining an equitable relationship among classifications."*

Out of 43 Nevada municipalities, private employers and western state governments invited to participate in the survey, approximately 49%, or 21 employers, participated.

This report reflects salary data in effect in January 2020.

Due to the small number of private employers who ultimately chose to respond to the survey, the percentage differentials indicated make it difficult to make any statistical inference due to unit-non-responsive bias.

Additionally, the salary data provided by the various entities, reflective of January 2020, may no longer be accurate due to adjustments to budget shortfalls that may have been made resulting from the COVID-19 pandemic therefore making the data volatile and difficult to use for statistical purposes.

A benefits survey was also conducted in conjunction with the salary survey. Benefits surveyed included Life Insurance, Retirement, Holidays, Sick Leave and Annual Leave. The results indicate that six of the participating municipalities/western states pay 100% of the employee's retirement cost and three do not contribute to the employee's cost. The remaining seven participating municipalities/western states average a contribution of 33.92% compared to Nevada's 14.50% contribution.

The range for Annual Leave days per year for these employers is 10-25 days as compared to the State of Nevada at 15 days per year. Ten employers have additional Personal and/or

Bereavement Leave banks. Seven employers cover 100% of the premiums for Health, Dental and Vision for the employee. Additionally, five of these municipalities/western states, out of the participating 16, pay a higher Life Insurance benefit than the State of Nevada.

SALARY SURVEY PROCEDURE

The 2020 Salary Survey Program was designed by the Department of Administration, Division of Human Resource Management to facilitate the collection, analysis, and presentation of wage and salary information used by Human Resource Directors, Elected Boards, and Commissions as a means for making and approving compensation recommendations. The program included the selection of classes, the survey sample, the survey methodology, and the application of the data as described below.

SURVEY SAMPLE

The survey sample includes Nevada employers and western state governments. Nevada employers represent a cross section of employers from the private sector, city and county governments, school districts, and hospitals. Western state governments include California, Colorado, Idaho, Montana, New Mexico, Oregon, Utah, and Wyoming.

SELECTION OF CLASSES

A class is included in the salary survey because it is a representative class selected as a basis for measuring the overall competitive position of the State with respect to salaries paid in the labor market. It will be used along with other selected classes as a basis for recommending any general across-the-board adjustment for State employees.

Thirty-two classes were selected as classes representing all classes and pay grades.

SALARY SURVEY METHODOLOGY

Employers were asked to report the minimum, as well as the maximum, salary paid for each survey class (also known as their salary range). The information provided was for salaries in effect in January 2020 and reflects any cost of living increases.

SALARY COMPARISONS

Salaries compiled for classes included in the classified employees' salary survey have been compared to salaries taken from the State's Employee/Employer paid compensation schedule. Employee/Employer paid salary information was selected because it more closely reflects the pay practices of the State of Nevada. According to State of Nevada Public Employees' Retirement System, approximately 67% of Nevada State employees are on the Employee/Employer compensation schedule.
